Characteristics and Projections of Ohio's 65+ Population

About this Report

This chartbook illustrates the characteristics of the state of Ohio's 65-plus population in 2015*, and changes that have occurred since 2000. It also includes population characteristics, such as education, income level, and marital status, that are shown to be associated with the need for long-term services and supports. There are charts that compare the older population of the state to the U.S. as a whole, and charts that illustrate change over time within the state

The data presented in this chartbook are intended to assist planners, decisions makers, and service providers to understand the growth in numbers and proportion of older adults, particularly those who will likely need assistance.

An online **interactive data center** is available for you to define your own topic, county, and population of interest to see current figures and change over time. Please visit www.Ohio-Population.org.

*Note: 2015 data represent a 5-year average of data collected from 2013-2017 as part of the American Community Survey (ACS), conducted by the U.S. Census Bureau. See the Ohio Population website for further details on methodology.

Profile of the 65+ Population

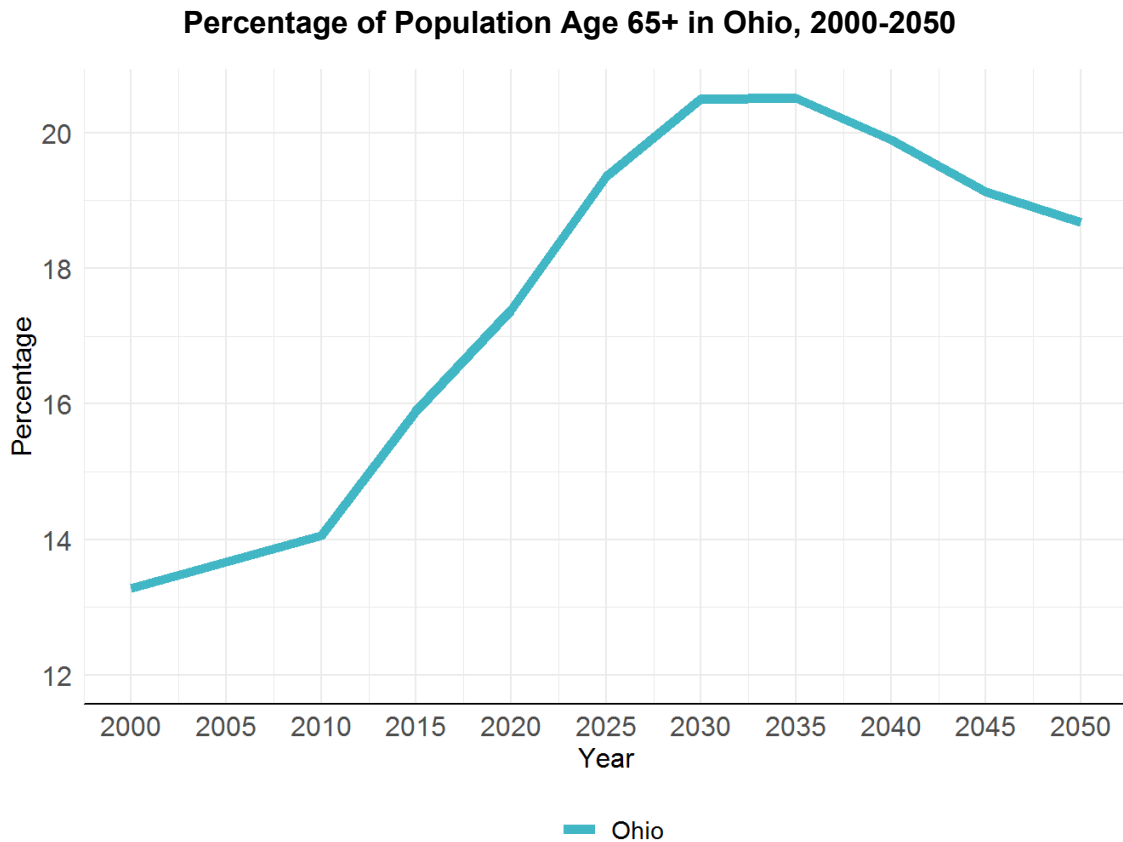

The table below compares the characteristics of the 65+ population in the state of Ohio and the U.S. overall. Keep in mind that the numbers and percentages represent only the 65+ population in each geographic area.

	Ohio		U.S.	
	2000	2015	2000	2015
Total 65+ Population	1,507,757	1,844,642	34,991,753	47,732,389
Median Household Income	25,672	38,738	26,814	41,876
Percent of Population Age 65+	13.3	15.9	12.4	14.9
Percent Below Poverty Threshold	8.1	8.0	9.9	9.3
Percent White Non-Hispanic	90.6	88.3	86.9	77.7
Percent Married	54.5	54.5	55.0	55.2
Percent with High School Diploma or Higher	66.1	84.4	65.5	82.8
Percent Living Alone	29.6	28.8	27.8	26.2

Percentage and Number of Older Adults in Ohio, by Age Group

	2000			2015		
	% of Population	# in Age Group	Total Population	% of Population	# in Age Group	Total Population
65-69	3.5	402,668	11,353,140	5.3	610,918	11,609,756
70-74	3.4	387,584	11,353,140	3.7	433,241	11,609,756
75-79	2.9	325,468	11,353,140	2.8	318,692	11,609,756
80-84	1.9	215,241	11,353,140	2.0	229,531	11,609,756
85+	1.6	176,796	11,353,140	2.2	252,260	11,609,756

Educational Attainment

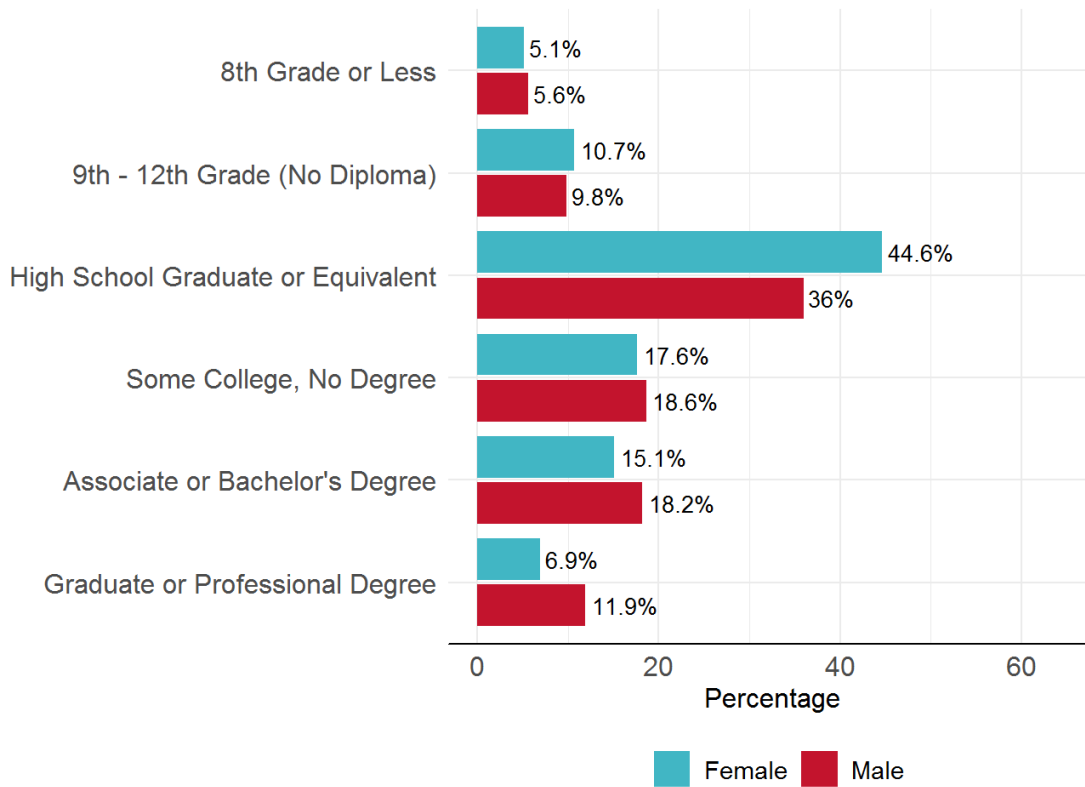

These charts show the proportion of the 65+ population at each level of educational attainment. The first chart compares the state of Ohio with the U.S. The second chart and accompanying table compare men and women within Ohio.

Educational Attainment of 65+ Population, Ohio and U.S., 2015

Racial and Ethnic Distribution of the 65+ Population in Ohio County and Ohio, 2000-2015

Race	2000	2015
Black Non-Hispanic	8.2	8.7
Hispanic	0.7	0.9
Other Races Non-Hispanic	1.2	2.1
White Non-Hispanic	90.6	88.3

Marital Status and Living Alone

These charts show the marital status of the 65+ population and the proportion living alone. The first chart and table show the change within the state between 2000 and 2015. The second chart breaks down marital status by sex. The third chart plots the proportion of older adults who were never married, married, and widowed/divorced/separated (W/D/S) by each age group (65-74, 75-84, and 85+). The final chart illustrates the proportion of 65+ men, women, and total 65+ population living alone in the state.

Marital Status of 65+ Population in Ohio

Percentage of 65+ Ohio Population Living Alone, by Sex, 2015

Source: U.S. Census Bureau. 2013-2017 American Community Survey (ACS) 5-Year Summary File. Integrated Public Use Microdata Sample, National Historical Geographic Information Systems (IPUMS NHGIS), www.nhgis.org.

Poverty Status

This chart shows the proportion of older adults* living below or near poverty. The measure used is the income-to-poverty ratio. In 2018, the poverty threshold for a person age 65+ living alone was \$12,043. Income below this amount is considered to be below the poverty threshold. A person with annual income between \$12,043 and \$24,086 would be between 100%-199% of poverty. Individuals with an income of 200% poverty and above have an income that is at least double the poverty threshold (greater than \$24,086).

Income-to-Poverty Ratio of 65+ Population in Ohio

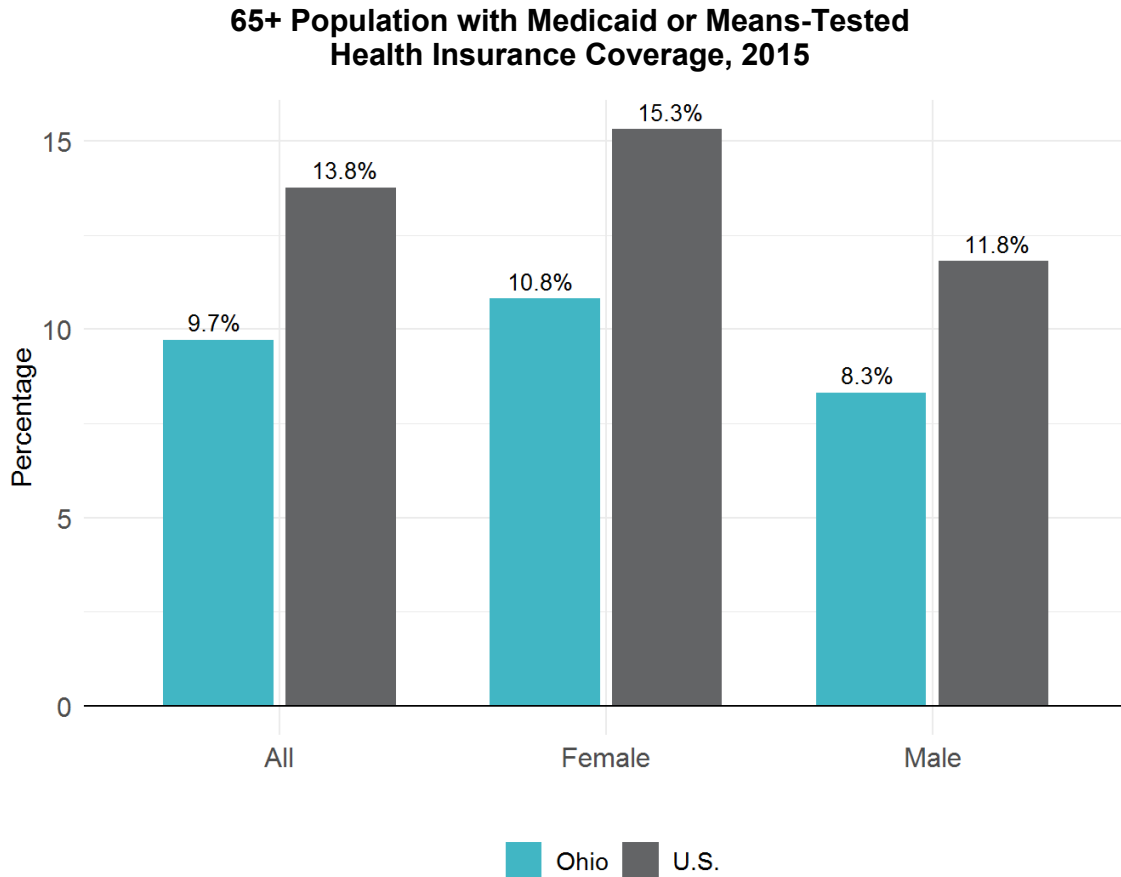

Sources: U.S. Census Bureau. 2000 Census of Population and Housing. 5-Percent Public Use Microdata Sample. U.S. Census Bureau. 2013-2017 American Community Survey (ACS) 5-Year Summary File. Integrated Public Use Microdata Sample, National Historical Geographic Information Systems (IPUMS NHGIS), www.nhgis.org.

*The percentage is not of the entire 65+ population, but only those individuals for whom poverty status could be determined. The poverty status is NOT determined for institutionalized persons, persons in military group quarters, or persons in college dormitories.

Medicaid Eligibility

This chart shows the proportion of older adults whose health insurance is provided by Medicaid or other means-tested coverage.

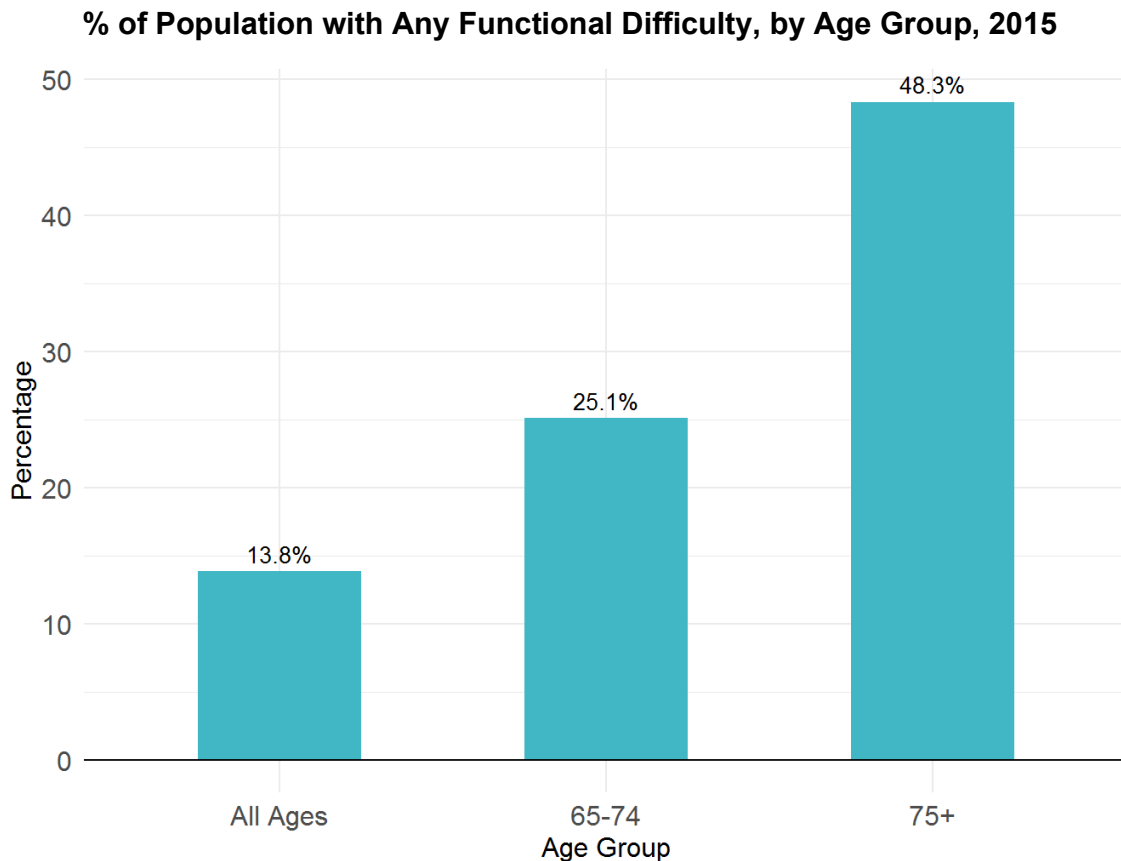

Source: U.S. Census Bureau. 2013-2017 American Community Survey (ACS) 5-Year Summary File. Integrated Public Use Microdata Sample, National Historical Geographic Information Systems (IPUMS NHGIS), www.nhgis.org.

Older Adults with Functional Difficulties

These data measure difficulty and functional impairment to identify individuals who may experience a disability. The charts show the proportion of individuals (all ages includes age 5+ or 18+ as appropriate, age 65-74, and 75+) that have reported a difficulty with one of six functional areas. The final table compares age groups 65-74 and 75+. The six areas are:

- Hearing difficulty: deaf or having serious difficulty hearing
- Vision difficulty: blind or having serious difficulty seeing, even when wearing glasses
- Cognitive difficulty: because of a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions (ages 5+ only)
- Ambulatory (mobility) difficulty: having serious difficulty walking or climbing stairs (ages 5+)
- Self-care difficulty: having difficulty bathing or dressing (ages 5+ only)
- Independent living difficulty: because of a physical, mental, or emotional problem, having difficulty doing errands alone such as visiting a doctor's office or shopping (ages 18+ only)
- Any functional difficulty: individual reported one or more of the functional limitations listed above

Percentage and Number of Older Adults with Functional Difficulties in Ohio, 2015

	Age 65-74		Age 75+	
	Percent	Number	Percent	Number
Any difficulty	25.1	258,117	48.3	360,547
Hearing	9.1	94,133	21.8	162,901
Vision	3.9	40,088	9.1	67,763
Cognitive	4.9	50,487	12.7	94,856
Ambulatory	15.4	158,393	31.0	231,393
Self-Care	4.4	45,377	12.3	92,037
Independent Living	7.4	76,462	23.8	177,349

Summary

These state population trends reveal important indicators of current and future need for long-term services and supports. The share of the population that is 65 years and older will continue to grow over the next 10 years. A higher percentage of the older population experiences poverty, compared to other adults. In addition, those at very advanced ages are mostly women who have outlived their spouses and most likely live alone. The combination of lower income, living alone, and higher prevalence of disability are all contributors to the need for long-term services and supports.

Additional county- and state-level data are available online at Ohio-Population.org, part of the Scripps Gerontology Center website.
